

## Reconstructing the Ecology of Ancient Humans Using the Chemistry of Fossil Teeth and Bones

Dr. Matt Sponheimer

Doctor of Philosophy in Anthropology

*Day of Revolutionary Speaking*

---

**BIO:** Mathew Sponheimer, Ph.D., is a professor of anthropology and director of the Nutritional and Isotopic Ecology Lab at the University of Colorado at Boulder. His research focuses on using chemical (and other) approaches to study the ecology of early humans and their antecedents. He also studies other mammals, both living and dead, large and small, on the African Continent. He publishes and lectures widely and is the co-editor of the book *Early Hominin Paleoecology*.
